DoD Launches Online Tool

New Web Capability Helps Suppliers Introduce Corrosion Prevention Products

By Ben Craig

Until now, product suppliers hoping to introduce their corrosion prevention and control (CPC) product or service to the DoD often encountered a painstaking process. Without a centralized source, finding the right information and contacts has not been easy. Suppliers familiar with these difficulties now have reason to celebrate.

The DoD Office of Corrosion Policy and Oversight has just launched a sophisticated and user-friendly Web tool to guide suppliers through the product introduction process. The tool, hosted on the DoD Corrosion Exchange Web site (<http://www.dodcorrosionexchange.org>), has consolidated the process for CPC product suppliers.

Traditionally, a big problem for suppliers was too many different points of contact. Figuring out which one to use was not always straightforward. Since product requirements vary from agency to agency, information about introducing a product was difficult to
